

```
1 import java.util.*;
2 class SumOfDigits
3 {
4     public static void main(String args[])
5     {
6         Scanner s=new Scanner(System.in);
7         System.out.println("enter any number:");
8         int a=s.nextInt();
9         int b;
10        int sum=0;
11        while(a>0)
12        {
13            b=a%10;
14            sum=sum+b;
15            a=a/10;
16        }
17        System.out.println(sum);
18    }
19 }
```
