```java
import java.util.Scanner;//printing of digits of gievn number
class Digits
{
    public static void main(String args[])
    {
        Scanner s=new Scanner(System.in);
        System.out.println("Enter any number:");
        int a=s.nextInt();
        int b;
        while(a>0)
        {
            b=a%10;
            System.out.println(b);
            a=a/10;
        }
    }
}
```
